Update for Week of February 15, 2021 12:18 pm

Trend of COVID-19 cases/positive COVID-19 tests:

The seven-day average percent positive has increased over the past week (2/7 to 2/14) from 4 to 4.2%. The seven-day average for cases per million has increased from 80 to 102.

Hospitalizations due to COVID-19:

I was unable to obtain this information from SIH this week. Please recall that hospitalization numbers can change rapidly.

Number of deaths resulting from COVID-19 in the past 14 days:

Four for Ionia County

COVID-19 cases for each day for every one million individuals:

Decreasing. You can get the daily numbers at <https://www.mistartmap.info/>

Percentage of positive COVID-19 tests over a four-week period:

Decreased from 8.1 to 4.2% (seven-day average) from January 14th to February 14th.

Health Care capacity strength:

Nobody knows what this means because the legislature did not define it.

Testing, tracing, and containment infrastructure with regard to COVID-19:

Demand for testing is still down overall and turnaround time locally is around 48 hours. Tracing and Case Investigation are improving, but the need to allocate staff for vaccination efforts means that response may be slower on clinic days. Containment infrastructure is weak.

K-12 can remain open provided there is no active transmission in the building. Please note that the B.1.1.7 variant is circulating in the community, making mitigation measures that much more important. We are in Risk Category D as a County.
