

## Permission for an Online Class

Students are permitted to take an online class when it is not otherwise available to them in their schedule. For enrollment to proceed the following must be acknowledged:

1. Online classes can have different start and stop dates from the LHS scheduled semester start and end dates. You are required to complete your school work within the timeframe aligned to your class. Failure to plan on the student's part will not result in an extension being granted.
2. Some courses taken online will require considerable effort and time on the part of the student. Students must be aware of their academic requirements for each class in which they enroll and plan to complete their work aligned with the pacing of the enrolled class.
3. Some classes, such as American Sign Language, require students to make recordings of themselves.
4. Online courses are taught by private entities and their grades are their own. LHS takes student grades at face value and will not alter letter grades under any circumstance. Please see your School Counselor if you have concerns about the grade you are earning in your online class.
5. Each online class has its own teacher. You should not be expecting LHS staff to provide additional educational support for classes you are not enrolled in with them.
6. Your online progress will be monitored regularly. Should your LHS Mentor Teacher reach out to you regarding your class you should respond promptly and take their concerns seriously.
7. Count Day Requirements will be communicated to you prior to Count Day. You will fulfill your requirements for Count Day to ensure we can continue to fund your enrollment in your online class.
